**Morning Tea, Lunch and Refreshments
available on sale day.**

A MESSAGE FROM THE MCINTYRE'S

Yet another year has past and 2020 will see Chateau host its 6th Annual Sale. This year with much excitement and anticipation the sale will be held at Andrew and Jenna's new property which they purchased at the end of 2018. It is something that the couple have been working towards for many years now. We are excited to be able to welcome you to the new home of Chateau for another generation.

We would like to extend our thought to those affected by continuing drought over the last year followed by a summer filled with fire effecting family, friends and clients. But as fate would have it a early break along the east coast coupled with a jump in the cattle prices make it a exciting time to be involved in the beef industry.

As the same as previous years the sale will be conducted in the shed via video auction. All bulls will be on display for viewing sale day. These videos will also be available pre sale for online viewing.

We will again be featuring our Chateau type of limousins including French Pure, Polled and Black bulls.

We are happy to discuss and help you with the selection of a bull suitable to your individual needs. It is with great pleasure that we offer our 2020 sale bulls to you and look forward to seeing you on sale day.

*John & Bev,
Andrew & Jenna McIntyre*

Thank-you for
your attendance and
support today.

Buyers Instruction

At the completion of the sale we ask all
successful purchasers to attend the office and
inform us of your delivery instructions.

LOOKING AFTER YOUR NEW PURCHASE

As our bulls run in mobs they are used to having mates around and are never left in the yards by themselves.

Upon arrival ensue that he has company (a steer or cow) and plenty of food whilst he surveys his new surroundings.

Be aware that this is a new environment to him and will take a while to get use to both you and your farm.

UNDERSTANDING EBVs

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured.

EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs: The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

AVERAGE EBVs for 2018 BORN LIMOUSIN CALVES

Gest	B.Wt	Milk	200 Wt	400 Wt	600 Wt	Docility
-2.1	+1.5	+7	+19	+33	+45	+40

Accuracies: Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES

HORN STATUS: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test. (2P) Homozygous Polled by pedigree, (P) Polled, (S) Scurred.

COLOUR: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not apricot).

PROTOPORPHYRIA STATUS: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for protoporphyria, (PS) Proto Suspect (parent of diseased animal). (PU) the animal has not been tested for protoporphyria or have parents which have been tested normal or are free by pedigree.

HOMOZYGOUS: Is the term where an animal has two copies of a particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous polled where by all progeny will be polled from that particular animal or Homozygous black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

LIMOUSIN ASSURANCE PROGRAM

As part of the Limousin Assured program, all bulls sold as fertile and capable of natural service. The purchaser has the right to a full refund of the purchase price of the bull (excluding salvage value and any cost or expenses to the purchases) within 12 months from sale date subject to submitting a veterinarian report stating the bull is infertile or incapable of natural service.

For a full details see

www.limousin.com.au/Limousin%20Assurance%20Program.html

THE SCURRED GENE IN CATTLE

Some polled cattle have scurs. Scurs are incompletely developed horns that are generally attached only to the skin. They range in size from tiny scab-like growths to large protrusions almost as large as horns.

Therefore, polled cattle can be smooth-polled or scurred-polled (polled but expressing scurs). Many breeders have the mistaken idea that scurs represent an error in transmitting the horned characteristic. That's not the case.

Scurred cattle should be classified as polled since they do have a polled gene. Only polled animals can express the scurred trait.

CATALOGUE DISCLAIMER

While all care has been taken in compiling this catalogue however responsibility lies with prospective purchasers to determine its accuracy.

Chateau Limousins reserves the right to retain 1/4 semen share for any lots offered for sale for in herd use only, with no further call on the bull. Collection to occur prior to deliver at vendors expense.

We reserve the right to make adjustment to sale order, substitute sale lots which will be notified to bidders via supplementary sheet on sale day
