# A MESSAGE FROM THE MCINTYRE FAMILY

On behalf of the McIntyre Family, we would like to extend our warmest welcome to our 12th Annual Sale being held on property at Londrigan.

While the last year has had its moments, we are very proud of how this year's draft of bulls have performed under some trying conditions, proving to us the value of utilising the very best of our own homebred sires backed by over 40 years of careful selection for easy doing, free-moving stock that are easy to handle.

With the greater beef industry having a kick along late last year, this highlighted the need for cattle with weight and finish. Whether they be in the front line of the weaner sales, through to export hook grids, the producers utilising hybrid vigour are being paid dividends.

This year's offering of rising 2-year-old and 18-month-olds is evenly balanced between Apricot and Black sires, with the majority being Polled, also with a large number of bulls being able to work over heifers while maintaining adequate growth.

On a lighter note, we are extremely proud to say that both girls have become invested in the "Chateau" brand by participating in several regional Victorian shows last spring, causing quite a stir and some cheek from our 'cow family'. What started out as a favour to assist some others, has quickly turned into a very prominent part of our weekends now. Alana & Olivia are keen to learn and be a part of working on the cattle at home and also show day preparations. It also has been great getting to see old friends and meet new people across all breeds.

In regard to the Sale, access to the online catalogue is available via our website, along with videos on YouTube and Auctions Plus. We have included QR Codes and Links further in the catalogue for reference. As always, anyone needing some extra info or a viewing of the bulls, our gate is always open. If you would like to view the bulls prior to sale day please contact Andrew on 0428 191 282.

We look forward to seeing you on sale day but if you can't make it, please don't hesitate to get in touch.

John & Bev, Andrew & Jenna,  
Alana & Olívia

## **BUYER DELIVERY INSTRUCTIONS**

At the completion of the sale we ask all successful purchasers to attend the office and inform us of your delivery instructions.

## **LOOKING AFTER YOUR NEW PURCHASE**

As our cattle are run in groups they are used to having other stock around and are never left in yards by themselves. Upon arrival please ensure that your purchase has company (a steer or cow) and plenty of food whilst they survey their new surroundings. Be aware that this is a new environment to them and will take a while to get use to both you and your farm.

# UNDERSTANDING EBVs

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured.

EBVs are provided for the following traits:

**Gestation Length:** ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

**Birth Weight:** indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

**Milk:** a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

**200, 400 & 600 Day Weight:** give us an estimation of the animal's genetic potential for growth.

**Docility:** is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

**Comparing EBVs:** The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed.

**BREED AVERAGES EBV's FOR 2024 BORN CALVES**

Gest.	BWt	Milk	200wt	400wt	600wt	Doc
-3.2	+1.4	+8	+23	+39	+55	+48

**Accuracies:** are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

**Disclaimer:** The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

## EXPLANATION OF SUFFIXES

### **HORN STATUS:**

(PP) Homozygous Polled by DNA test or pedigree as both parents confirmed Homozygous Polled

(P) Polled

(Ps) Polled with Scurs

(H) Horned

### **COLOUR:**

(BB) Homozygous Black by DNA test or pedigree as both parents confirmed Homozygous Black

(B) Black

(A) Apricot

(R) Red (not apricot).

### **F94L GENE:**

(AA) 2 copies by DNA test or pedigree as both parents confirmed to carry 2 copies

(AC) 1 copy by DNA test

(CC) No copies by DNA test

(U) Un-tested

# THE SCURRED GENE IN CATTLE

Some polled cattle have scurs. Scurs are incompletely developed horns that are generally attached only to the skin. They range in size from tiny scab-like growths to large protrusions almost as large as horns.

Therefore, polled cattle can be smooth-polled or scurred-polled (polled but expressing scurs).

Many breeders have the mistaken idea that scurs represent an error in transmitting the horned characteristic. That's not the case. Scurred cattle should be classified as polled since they do have a polled gene. Only polled animals can express the scurred trait.

## CATALOGUE DISCLAIMER

While all care has been taken in compiling this catalogue however responsibility lies with prospective purchasers to determine its accuracy.

Chateau Limousins reserves the right to retain 1/4 semen share for any lots offered for sale for in herd use only, with no further call on the bull. Collection to occur prior to delivery at vendors expense.

We reserve the right to make adjustment to sale order, substitutes to sale lots which will be notified to intending buyers via supplementary sheet on sale day.
